

# American Drilling Systems

## **HPZ-200**

### **Heli-portable Drill**

The HPZ-200 Drill Unit is a one piece helicopter portable drill which weighs 1300 lbs. A separate support basket is used to carry the drill stem, fuel and other supplies.

The drill is equipped with a sixty horsepower diesel engine, and with the powerful 2500 psi hydraulic system enables this machine to drill depths of 40 meters in most formations. When the HPZ-200 is coupled with the XD-185 compressor unit, it has the capability to drill through solid rock with ease. This unit, when properly configured, can drill with downhole hammers, air-water, dry or wet auger.

American Drilling Systems offers over fifteen years of proven experience in design, manufacturing, sales and service to the oil exploration industry. With experience from the arctic cold to the heat of the jungles in South America, we have led the way in innovations and technology to aid our clients in gathering data from the worlds harshest environments. Our commitments to excellence will continue to inspire us beyond the twenty first century.
